Subject: Microsoft settlement

I think it is disgusting that Microsoft may be allowed to expand it's market monopoly by donating it's own software to schools. This only expands the monopoly that the company wants to have of the software market.

We will be training our children to use the very product that we are claiming wants to dominate the market. Would we allow drug dealers to donate their product to schools as a penalty? Another problem is that when Microsoft donates \$5 worth of product they will claim \$500 of tax deduction for losses. What a scam!

I can see Bill Gates proposing this plan, but I can't believe that anyone would accept it! He should be laughed out of town.
